Tomasz Radecki

Summary of experience

During study I have worked on:

- Creating websites using HTML, CSS, PHP, JavaScript (https://robssson.github.io/index.html)
- Creating football application using C# (https://github.com/robssson/GAMER)
- Designing databases using MySQL
- Creating simple applications using Python
- Creating applications in R (https://github.com/robssson/Visualisation-tennis-statistics)
- Creating Neutral networks in Python (linked with app)

In my own time I am working on:

- Learning about Big Data
- Creating application linked with my bachelor dissertation (using Python)
- Data Visualization using Python
- Improving my English skills

Technical skills

Technologies I learn now: Python, SQL, JavaScript

Technologies I used in the past: Pascal, C, C++, C#, VBA, Java, Android, XML

Experience

Internship in Spider-net (Italy)   Autumn 2013

I was servicing PC hardware, configuring local internet networks and helping company's clients with configuring operating systems. I learned how to represent company's interests with competence.

Internship in Woodward   Summer 2017

I worked in the software design department. I programmed in Java as well as Python. My main task was to create a functional plug-in for eclipse that supports the build system. I also was creating a tool to help testers.

Education

Currently I am student of Information Technology and Econometrics at University of Science and Technology (AGH), Cracow (Third year).

Mindset

- I love learning new things
- I am very inquisitive and often get excited about research findings
- I like running, playing football and tennis – that last one I only watch, but maybe some day…

Personal and contact information

- Born: 7th July, 1995;
- Address: Lea 140/5, Cracow, Poland;
